The Clever Sure Fire Way To Guaranteed Signups

Get Ready For Some Good Old Hard Work!

Let's start off by having you watch a short video.

This video will explain what we want to accomplish in this training.

Scroll down to page 15 for view video diagram.

[Click here to view this short video.](#)

You should now know what our goal is by now. A hands off approach to signing up people into your business. As you can see this technique works with just about any affiliate product, network marketing product or MLM business online business.

One thing before we get started disregards any of the website sites used within the video you just watched.

However you can add to your traffic by adding a ninth and tenth step to the method we will be using below.

Another note before we get started. If you don't want to put in a little work up front this is not for you. I will also say this "This will work if you take the time to set it up"

That is why it is called "*The Clever Sure Fire Way To Get Guaranteed Signups*".

So here what I suggest. Take about a week and get this right. Think of it like this, once you do this work it gets a lot easier the second time around.

Note: If you already have experience doing this that means you already have the accounts setup and you can do this in two days instead of a week.

Once this is all setup you will just sit back and let it run. Then watch your hit counts in your back office. Then you will start watching signups start rolling in.

You can even add a ninth and tenth step to jump start your business for even faster results. However we will only complete eight steps within this training.

The Clever Sure Fire Way To Guaranteed Signups

Now let's get started!

You will need some keywords for this plan to work correctly. You will also need your GVO web link address Example: (<http://www.fouryoursuccess.com/1/tk.cgi?gv>) or a splash page.

I suggest sending your signups directly to your GVO Splash Page first. That way you can track your hits in your GVO back office.

Later on you might want to send your leads to a splash page with a video. This is the best way to build your own list. If it is done this way after you get six signups you can start helping you your first line of signup get there first six signups.

Now Let's Get Started!

1. Now let's start by finding eight articles and eight keywords.

Don't worry it not a full page article. These articles are to be short sentences related to the GVO product you are promoting. Remember one short sentence will do just fine.

Now for each article you write do this – place your eight sentences and eight keywords into a notepad file or a WordPad file as you retrieve them from the top 30 websites.

2. Get your one sentence articles and keywords from a top thirty Google search. Use the six keywords below to perform your searches.

Make sure the keywords you find are long tail keywords. That means three to five words long keyword phrases. Make sure you use GVO as part of the keyword.

The Clever Sure Fire Way To Guaranteed Signups

Example: Keyword Phrase – **GVO International Revealed**

Now use the six keywords below to perform your search.

GVO, GVO Scams, GVO Reviews, GVO International, GVO signup.

Note: Again – Copy the best 8 sentences and the 8 best keywords you can find when doing the searches.

Now make sure you copy all eight sentences and all eight keywords into a WordPad file as you find them.

3. Now match one keyword to each sentence.

Note: the 8 keywords will be put into your title when inserting them into the article directories and social networks. You will also want to embed your keyword somewhere within you sentences.

4. Now reword the 8 sentences so that your title can be inserted into your sentence.

5. Now sort the 8 keywords on separate lines.

6. Now under your each keyword put your keyword match sentence.

7. Now signup with the 12 Free Websites Below. If you already have an account with companies / websites fine use it your old accounts. When signing up with these companies / website, make sure you use only one email address and the same password for all sites.
